

Quantum Puzzle

Objective: Separate the two pieces. Too difficult? Here's a hint.

To separate:

1. Align loops with the large knobbed ends pointing downward. Piece 1 should have the small knobbed end coming back to front.
2. Piece 2 should have the small knobbed end going from front to back.
3. Grab near the large knobs on both sides, rotate both ends clockwise until they pull apart.

To attach:

Reverse above actions.
